MINES AND MINING STOCKS.

FINANCIAL AND COMMERCIAL.

UTAH-APEX STORY CAUSES A STIR

NEVADA CONSOLIDATED BIG

BECK TUNNEL ORE BRINGS GOOD PRICE.

Not a little indignation was excated that "it has the overlying and miles an hour, nderlying apex rights of all proper-es in its vicinity," was characterized s being dangerously near blackmail. Manager R. H. Channing of the Utah nsolidated is out of town for a few ys, but one of the state's largest op-ators and a man who is thoroughly nformed on conditions in Bingham, aid he felt called upon not to allow Mr. Horne's innuendos to go unanered. In order to save people from ing gulled by a set of clever finanrs and to prevent the camp of Bing , this operator asked to be quote

the subject as follows:
'In the first place, I wish to refute e wrong impression given as to the ation of these properties. The claims e said to be adjacent to the Utah posolidated. While this in a smail is true, they are a long arly half a mile northerly, from the mestone formation which contains the arge ore bodies; and that portion of the Utah Consolidated which is adja-

Refers to Government Report.

"In substantiation of this statement refer you to "Professional Paper No. on Economic Geology of the Bingm Camp," pages 383, and 271 to 274, clusive, and published by the United ates geological survey, where it res to the Parnell, Minnie and York nes. It will be noted that all through use pages in referring to the dip of Therefore, when it is known the veins of the Utah-Apex are a mile to the north of the Utah nsolidated, and that they dip to the rth or away from the latter com-ny's ground, the Utah-Apex's claim at its veins apex the Utah Consoli-ted is seen to be outrageously in-rect and misleading.

The ore bodies of the Utah-Apex a far different from those of the ah Consolidated. The latter are very tringe, some of them 200 feet long, 15-tet wide and fifty to sixty feet thick hile those of the Utah-Apex are rare ut four feet of waste has to be re-The flatness of the or very expensive to mine, as exam-ed by the fact that it takes twentyen to maintain an average out etter than one ton of ore per man, hile the adjacent properties average out three and one-half tons per man. We have often heard statements of e wonderfully large ore body found the Coromandel tunnel, and that then the Parvenue tunnel, both of the tah-Apex company, which is now ding driven was completed, active oping would begin on one of the larg-t ore bodies in the camp. I am inremed by competent engineers that e ore in the Coromandel tunnel is ry silicious and that it does not con-in copper contents of sufficient value permit of profitable mining.

No Connection With Yampa.

The Yampa is also referred to in the terview with Mr. Horne, who intiates that the whole country's apex sts within the boundaries of th tah-Apex ground. To offer a defense or the Yampa would be to expose myelf to ridicule. It can do no harm to ay, however, that the Yampa cropigs are the strongest in the camp uning clearly within the side lines of company's claims. This ledge has opened and developed on its dip en opened and developed on its dip-om the surface for more than 1,290 et. From this property the ore de-sits of the Utah-Apex are to the orth and dip away from the Yampa. "In summing up, let me inquire how is that no one is permitted to ex-nine the workings of the Utah-Apex inest how is it that when members." es: how is it that when member e never permitted to see or talk to ybody other than those selected to out them through the mine? Why e they hurried off to their trains the ment their inspections are conclud-rather than to give them a chance see some of the neighboring mine I converse with men who know th y claim for it, and if it really had physical advantages claimed in Mr. dtimate mining enterprises of the John J Banks, Jo mp be made to bear the odium of tary and treasurer. ich an unwarranted statement a nat attributed to the company' easurer by a Boston paper? It i atrageous and indefensible."

NEVADA CON. IS BIG.

Newton Dunyon Passes Judgment on

TESTING NEW PROCES:

256 Beck Trumed at 194e.

256 Carisa at 1c. Carisa the Great Copper Property. Newton Dunyon, superintendent of Daly-West mines, at Park City, ns just returned from a trip to Ne-ada, which included a run into Ely nd an inspection of the Nevada consolidated company's Ruth group mines. He did not find time inspect the workings of the compa-s Eureka group, but as that proper-

y's Eureka group, but as that properise located upon the same great minal belt and in close proximity to the uth, he felt satisfied that one was mply a counterpart of the other. Peaking of the property which he insected in company with R, H. Chaning, general manager of the Utah onsolidated company's Bingham imes, Mr. Dunyon said:
"It is one of the biggest things in the ay of a mine that I ever saw in my fe. The copper occurs in a big porhyry dyke, much in the same way lat it makes at Bingham. The mine as now opened to about 600 feet in 19th, and levels have been established regular intervals. On one of the Montana-Tonopah made at the Reno Reduction works by the Pohle process.

The Pohle process is arecent myention of E. C. Pohle, late chief chemist and assayer of the Globe plant in Denver, and is owned by Mr. Pohle and H. C. Morris, superintendent of the Blue Bull Mining company at Goldfield. The test run was made under the supervision of Mr. Morris, who states that the result proves conclusively that the sulphide ores of Tonopah can be treated successfully by the Pohle process.

REPORT FROM ONTARIO.

REPORT FROM ONTARIO. regular intervals. On one of the Mine Still Draining-Tunnel Invels Mr. Channing went out in oss-cut in one direction and I took

found, when comparing notes, that we had been a total distance of about 360 feet through solid ore, with each face still in it. How much wider the belt will prove it is hard to say, but that ought to be enough to satisfy the most exacting. From what I saw and could learn while at the property, I am convinced that all of that tremendous mass of ore will average better than 3 per cent copper.

"The company is doing everything on a splendid and permanent basis, and after the railroad is completed from Toana to Ely things will hum. Until the road is completed little can be done in way of smelter and mill building, as it is out of the question to think of their hauling in the heavy machinery and vast quantities of structural and other material that will be required by team. On the way out I learned that sixty miles of the 150 miles of road bed had been graded and that the rails were laid for forty miles.

The local offices of conditions yester-day. Superintendent Matt Connolly state that, while the flow from the tunnel had not been measured, it was running more water than he had ever seen come from it previous to the caye-in of last spring.

Though it was hard work to stem the current, Mr. Connolly succeeded in working his way into the tunnel for a distance of 5,000 feet, and for that dista Mining Operators Are Indignant

3 per cent copper.

The company is doing everything on a splendid and permanent basis, and after the railroad is completed from of road bed had been graded and that the rails were laid for forty miles.

Ely is destined to be a mighty big camp. The Nevada Consolidated will stand at the head of all operating companies over there, without doubt. but there are a number of fine mines The Giroux Consolidated is buildging director of the Utah-Apex com-

From Ely Mr. Dunyon made the trip to Wells, on the Southern Pacific, in a as the Utah Consolidated and Yampa sixty-horse power Winton auto and covered the 150 miles in less than eight the Utah-Apex territory, and his as-sertion that his company's ground is so and one-half hours, the actual running time for the distance being twenty

SAMPLE MILL IS BUILDING.

Boston Con. Porphyries to Be Thoroughly Tested as Work Goes On.

order that the management will is being developed through the unmerous tunnels that are puncturing the mountain of copper-hearing perphyry in the Boston Consolidated company's mines at Bingham, a sample mill is now under construction. The company's metallurgical engineer, A. J. Bettles, has designed and will equip the plant with devices calculated to make a close saving of values, and he stated yesterday that he would have it in commission before the close of the year. The grade for the plant, which is to be erected across the guich from the Ohio company's ore blins, is now completed, and carpenters are busily engaged in framing timbers for the building.

The mill will be equipped with a

check which it will be possible to keep on the rock as development progresses, through the medium of the sample mill, will leave nothing to be determined once the mammoth plant that is to be erected near the American company's big smelting works is ready to go into commission. Mr. Bettles is sanguine that the stamp method of crushing will prove most efficacious in reducing the slimes to a minimum and the sample mill will give him every opportunity to test thoroughly this feature of the business and prevent the possibility of mistake in the equipment of the big works. equipment of the big works.

BECK TUNNEL ORE SOLD.

Initial Car Nets \$34.75 Per Ton-Reservation Claims to Be Worked.

Provo. Nov. 14.-Jesse Knight has received returns from the first car of or

moved, which has been the case in the past.

T. H. Kerr, A. H. Tarbet and others have located forty locations of 169 acres each as petroleum claims in township 10 south, range 3 east, Salt Lake meridian. The lands are in Spanish Fork canyon south of the red narrows.

F. W. C. Hathenbruck is getting ready to go on the Unitah reservation with a force of men to remain all winter. He will put in the time in opening up ten groups of claims in which he is interested, one of them being the Rhodes mine, and expects to be ready to ship ore from some of them next spring. The assays on the surface of the claims run from \$3 to \$400 gold in addition to some silver and copper.

BIG COMPANY ORGANIZED.

Provo Talent Is Preparing to Mine in California.

Provo. Nov. 14.—Articles of incorpora-tion of the Inyo Gold Mining company have been filed with the county clerk. The company is organized to do a general mining business, with Provo as the place of its general business. The capital stock is \$1.000.000, with shares of the par value of \$1 each, subscribed as follows:

as treasury stock.
c company owns the following muchains in Echo Mining district, Inyo dy, California: Stray Horse, The ge, Trade Dollar, Stella, Myrtle, Lo-Fen, Dorris Climax, Jumbo, Gold Dölfogo, Granger Girl, Tom Thamb, Iro-Midget, Gypsy Girl and Tramp Nos. 5 inchesity.

o inclusive officers are: L. Hoise officers and directors are: L. Hoise, president; Chet Leavitt, vice prest; James M. Creer, Oran A. Lewis J. Banks, John R. Twelves, secre-

TESTING NEW PROCESS

Ore in a Pioche Property.

George Arbogast and Robert Mulhail, who have a lease and bond on the Daly East mining claim about a mile southeast of taown, have made their first payment and have been quietly opening up the property the past few months, says the Pioche Record.

From the developments made on the the Property the past few months, says the Proche Record.

From the developments made on the surface and bottom of the shaft which is number 4, from 100 to 200 feet deep all sunk on the vein show its permanency and richness. On their surface workings they have extracted and are sacking some very high gravle gold ore, assaying from \$50 to \$100 per ton. All who have inspected the mine pronounce it the making of one of the best gold properties in the state.

The vein is on what is known here as the main pay porphyry dyke which the big Raymoud and Ely. Yuha. Meadow Valley and other big mines here are on, which is one wall and quartite the other.

Tonopah Ore Shipments.

The ore shipments over the Tonopah railroad last week aggregated 1,819 tons, divided as follows;
From Tonopah—Tonopah company, 985 tons; Tonopah Extension company, 530 tons; Montana-Tonopah, 200 tons; Belmont, 190 tons; Midway, 94 tons.

MINING STOCK EXCHANGE.

Trading Is a Little Better, With

Other Conditions Unchanged. The market behaved vesterday precisely pany's ore bins, is now completed, and carpenters are busily engaged in framing timbers for the building.

"The mill will be equipped with a battery of five stamps, each weighing 1,259 pounds," said Mr. Bettles, "and the concentrating devices will include two Wilfley and one Johnson table and two Wilfley and one Johnson table and two Wilfley and one Johnson table and two Frue vanners. This equipment will all be on the ground within a few days, or by the time the building is ready to receive it, and within four to six weeks I expect to have it ready to run."

While the general average of all the copper-bearing porphyry is and can be casily obtained through the usual practice of sample assaying, it is the purpose of the management to know all the time just how the rock from the numerous tunnels will mill. There must, of necessity, be some variation, and the check which it will be possible to keep on the rock as development progresses, through the medium of the sample mill.

Mining Notes. Two cars of ore from Alta, two from Tintic, one from Idaho and one from Nevada were reported at the Pioneer sam-

The Taylor & Brunton sampler yester-day reported the receipt of seven cars of ore from Tintic, four from Bingham, one from Idaho and one from Nevada. Advices from the Nevada-Alpine company's property at Lone Mountain, Nevare to the effect that the great contact is being neared on the lowest level and that the prospects for opening one of the biggest bodies of rich silver-lead ore that was ever encountered in the state are excellent.

Ernest Bamberger, who holds a bond on the Ne Plus Ultra mines near Hamilton, in White Pine county, Nevada, has just returned from a trib to camp, having mapped out a plan of campaign and put a number of men to work on the property. He got back just in time to begin serving his country as a grand juryman.

Money, Silver, Etc.

New York, Nov. 14.—Money on call, casserves by the banks at this time. It was considered that the deficit in the legal reserve requirement established on Saturday left the percentage of total reserves to deposit liabilities at 24.76 per cent, while the percentage of total reserves ever, since the 1st of September, with the xeption of the week ending Oct. 24, and that ended Oct. 8 had below 26 per cent. The actual change in the condition of the banks therefore was net great aside from the sentifore was net great aside from the sentification. fore was not great aside from the senti-mental effect of the existence of an actual deficit in legal reserves. Specu-lative feeling was disposed to the view that the banks were not called upon at this time to go further than to repair the actual deficit. The pressure upon business conditions, supplemented by the speculative demand based on confidence in the general business' situation. These conditions explain the extraordinary expansion to which credits of the bank have been extended and these same conditions are looked to to maintain confidence in the great volume of outstanding credits. Nothing like distrust has been cited as the cause for any of the loan contraction which has been put into force but simply the limitation of resources to meet the extraordinary demands for credits. However, the demand upon the bank reserves continued, the operations with the sub-treasury since the last bank statement having withdrawals already of \$1.421,000 from the banks. With the easing of the money rate during the course of today there was also a raily in foreign exchange rates and the prospect of an important movement of gold. the money market at this time is recognized as due entirely to the active business conditions, supplemented by the speculative demand based on conpect of an important movement of gold was thus dissipated for the present. The last prices for stocks was the best and closing was active and strong at uniform net gains running from 1 to 2 points for the principal stocks. Bonds were irregular, total sales, par

United States 2s and old 4s advanced 14 and the 3s 1/8 per cent on call, while the new 4s delind 1/6 pr ent on call.

Do significance.

But the high rate of today was held only momentarily and a very small amount of money was placed at that rate of interest.

Later in the day after the orincical demand had been satisfied the rate fell below 10 per cent. This occurred much earlier in the day than was the case yesterday and was the result of freer offerings of funds. The actual situation of the money market therefore was considerably ameliorated as compared with vesterday. The liquidation affected yesterday of course, was a factor in the strengthening of the banking position. Large loans placed by foreign capitalists also played a part. Reports were current that placing of Canadian funds and a movement of gold to New York from Canadian of Sold 10 New York fr

GRAIN AND PROVISIONS.

Chicago, Nov. 14—Initial quotations in the wheat market showed fair gains, the May option being up 140% to % at 88140 885. The market at the opening was influenced mainly by the unexpected strength at Liverpool, the weakness of yesterday at Chicago having apparently little effect on the English market According to a foreign statistician the advance at Liverpool was the result of reports from Argentina to the effect that much damage had been wrought to the wheat crop in the northern districts by rains, followed by frost. There was seemingly less uneashness here over the money situation in New York. This lack of anxiety was generally attributed to the fact that the majority of the weak holders had disposed of their lines in the general liquidation of the past few days. As the session advanced reports of improved buying of foreign demand gave impetus to the upward tendency of prices. At New York twenty boat loads were reported taken for export while a similar amount was said to have been shipped from an urgent demand from millers was a further incentive to the purchase of option. Another builtsh influence was the comprehensively small increase in the world's visible supply. As shown by Bradstreets, available stocks increased only about 1.000,000 bushels for the week, compared with an increase of 6,500,000 bushels for the corresponding week of last year. The liberal prinary movements in the United States was apparently ignored. Chicago. Nov. 14.-Initial quotations the wheat market showed fair gains.

Preferred 300 1024 1024 1025 sion houses were active bidders. Offerings Schloss Sheff ... 8.700 7775 7474 7575 at times were light. At 88% 288% May reached the highest joint of the day. Final quotations were up % 673 at 88%. The corn market ruled firm throughout the day. May closed % cent higher at 45%.

RESTRICTED.

Reports were current that placing of Canadian fucks and a movement of sold to New York from Canadian points were factors at work in the money subtation. The circulation of rumors also continued of ultimate intervention by the secretary of the treasury to ease the situation in case of any threats of called weakness of vesterday. The relaxation in the money market was the nominal cause of the movement, attended relief measures to the needs of the day indicated a degree of stringency that had a decided restrain on any large renewal of speculative operations. She rate touched was 10 nor.
